

PROJECT STATEMENT :-

Ever since the onset of the covid-19 pandemic , keeping track of the number of covid positive cases has been the top priority for officials as well as for the people. Also since the economic crisis has accompanied the pandemic , crime rates have increased . Here is an interface where the information about the statewise covid cases and crime rates are provided to the people . The aim of this project is for the statewise data analysis of covid and crime cases . The starting of the project will display a screen which has the buttons that direct the user for crime or covid analysis . After clicking the desired option , the user will be directed to the screen where the analysis is done . The analysis is done with the help of pandas , matplotlib and csv files extracted from trusted websites .

LIMITATIONS :-

Extracting more data was not possible for both covid and crime due to its inavailability and authenticity . Line graphs were not included in the analysis due the absence of the required data. There is no provision given for the user to change the data of the main dataframe printed at the beginning of each analysis .

General Advisory to all passengers People must follow required health protocols, self-monitor their health and travel only when they have no symptoms related to COVID-19. At all times which includes use of mask/face cover, hand hygiene and physical distancing. Mask must be worn properly to cover nose and mouth. Touching the front portion of mask is prohibited. All passengers shall be advised to download Arogya Setu app on their mobile phone. For more information, contact the District Health Officer or the State/National Call Center (1075).

Enter a number by refering the above dataset index 10

Wear a face mask in public indoor spaces. Maintain at least six feet of distance between people. Get vaccinated and boosted as soon as you are eligible. Avoid close contact with people who are sick. Cover your cough or sneeze with a tissue, then throw the tissue away. Wash your hands often with soap and water.
